Comment on YouTube Veritasium post:

The 4 things you need to be an expert

<https://youtu.be/5eW6Eagr9XA>

9:02 - "... stocks are a low-validity environment ... clear and immediate [feedback] doesn't reflect ... decision making [quality]." So, given 50 years of lots of very sharp folks getting clear and immediate publication feedback on a topic that has shown little progress, would you agree theoretical physics is a low-validity environment with few real experts?
